Learning from the class

A scrum master is the facilitator for an agile development team. Certified ScrumMaster® (CSM®) is a designation offered by Scrum Alliance to practitioners who have successfully completed a CSM® course and demonstrate their understanding through the CSM® test. A CSM® performs the following functions:
1. Aids project teams in using Scrum effectively
2. Provides expertise above that of a typical Project Manager
3. Acts as a 'servant leader' and helps the team work together and learn framework
4. Protects the team from internal and external distractions
5. Helping the Scrum Team to avoid or remove impediments to its progress, whether internal or external to the team.
6. Facilitating team events to ensure regular progress.
7. Educating key stakeholders in the product on Scrum principles.
8. Helping the Product Owner maintain the Product Backlog in a way that ensures the needed work is well understood so the team can continually make forward progress.

"Previously Agile Operations were not possible, now they are compulsory"
